Office:

Preferred Method of Contact:

First Day Contact: Alexis Miller; Medical Education Building Suite 401 – 1000 Blythe Blvd, Charlotte, NC

Course Description

This is a 4-week elective in Pediatric Hematology Oncology which will take place at Levine Children's Hospital primarily in the Pediatric Hematology/oncology Clinic. Learner could also have inpatient exposure depending on interest and can discuss with course director prior to elective. Learner would be exposed to multiple different clinics and types of patients including sickle cell disease, benign hematology, hemostasis/thrombosis, leukemia/lymphoma, solid tumor clinic and Neuro-Oncology.

Credits, Hours, and Prerequisites

Length of course: 4 weeks

Course Environment: Inpatient/Outpatient/Other

Location(s):

Prerequisite(s): successful completion of Year 3

Blocks Offered: 1-3, 5-12

Number of Students/ per Block: 1

Methods of Instruction

- Clinical Experience – Ambulatory
- Clinical Experience – Inpatient
- Case-based Instruction/Learning
- Conference
- Independent Learning
- Journal Club
- Patient Presentation – Learner
- Ward Rounds

Textbook, Course Materials, and Resources

None specific. Students will be given a syllabus which has links to a few resources such as an article bank and a few important websites. Students are encouraged to do article searches to learn about their patients.

Technology Requirements

- Internet connection
- Access to Canvas, the learning management system used by Wake Forest University School of Medicine and other required online content
- Access to wfusm.edu email

Part 2: Course Details

Course Success

If you find that you have any trouble keeping up with assignments or other aspects of the course, contact your course director and coordinator as soon as possible. As you will find, building rapport and effective relationships are key to becoming an effective physician. Be proactive in informing your course director and coordinator when difficulties arise during the rotation so that we can help you find a solution.

Grade Assignment (Grading Scale)

Students will be assessed based on their medical knowledge and clinical skills as well as their professionalism and professional development. Students are expected to demonstrate responsibility in actions throughout the course. This includes, but is not limited to, turning in assignments and responding to communications in a timely manner and following the absence policy.

Standardized Clinical Elective Grading Criteria	Professionalism: Professionalism Score (PS) & any specific professionalism concerns Φ	Clinical Score: Clinical Skill Evaluations
HONORS	≥ 3 on PS & no concerns	≥ 3.5
HIGH PASS	≥ 3 on PS & no concerns	≥ 3.1
PASS	≥ 2.0 on PS & no specific concern	≥ 2.0
FAIL	< 2.0 or specific concern	< 2.0

Φ The Final Professionalism Grade is comprised of the Professionalism Score (PS) [the average of the last 3 questions on the Y4 standard clinical evaluation form] **and** whether there is a specific professionalism concern(s). All parameters must be met to earn the grade level listed. If all conditions are not met, the next lower grade is earned. Specific comments are reviewed carefully, and additional information is sought from all parties involved if there is a concern. Professionalism and/or clinical performance concerns may not be immediately reflected in an evaluation form but may have been

brought to the attention of the student, resident, faculty physician, and/or Course Director. Significant professionalism problems can lead to a lower or failing grade for this course, independent of performance on any other aspect of the course. Examples of significant professionalism concerns can include, but are not limited to, concerns with interactions with patients, healthcare team interactions (faculty, residents, staff, and peers), or course staff (coordinators, instructors, administrative staff), and/or course directors; professional development; lack of or late responsibility fulfillment and task completion by stated deadlines; a low or concerning level of engagement and/or work ethic; receptiveness to feedback as perceived by the faculty, resident or course director; repeated tardiness; failure to reply to communication from the course coordinator, director or course faculty in a timely manner (which includes email, direct conversations, text messages, and/or secure chat); and failure to or refusal to meet for required or requested-feedback session(s) or requested meeting(s) including but not limited to midrotation and/or end of course meetings. The course director, the Year 4 Operations Team and/or Associate Dean of Clinical Education has the authority to define a problem as being "significant." The course director, the Year 4 Operations Team and Associate Dean of Clinical Education will determine a specific professionalism concern's effect on a student's final grade for this criterion. Students must pass this criterion of the course to pass the overall course. Significant and/or persistent professionalism concerns as determined by the course director may also be formally reported via the Professionalism Concern Reporting Standard Operating Procedure and may result in a referral to SPARC.

Evaluation

Students can view all evaluation forms on the Y4 Curriculum Canvas site.

Midrotation Self-Assessment & Feedback (required for AI and ICU courses):

A formal mid-rotation self-assessment and feedback session is a requirement for acting internship (AI) and ICU courses. Informal feedback sessions may also be required in other courses as determined by the course director.

Clinical Course Evaluation (AI, ICU, Clinical Electives):

Students are encouraged to seek formative feedback throughout the rotation. Students will also need to schedule time for mid-rotation feedback for courses that require it. If, at the time of mid-rotation feedback, there are concerns regarding student performance in clinical skills, medical knowledge base, and/or professionalism, the course director will provide feedback and work with the student to develop strategies for improvement. If there are concerns regarding professionalism, the Course Director will work with the Associate Dean of Clinical Education to determine if a formal professionalism concern report will be submitted. If concerns are noted after mid-rotation feedback, persist throughout the course, or are reported/discovered after the course has concluded but before the grade is posted, the course director will seek additional information from faculty, residents, other students, and/or staff, and may request a subsequent meeting with the student to discuss these concerns. The final grade will accurately reflect all concerns.

The standard Year 4 Evaluation form will be used to evaluate student competency on a subset of the AAMC's Entrustable Professional Activities (EPAs) as well as Professionalism, and will be completed by the faculty, interns, residents, fellows, and advanced practice providers who have worked with the student during the rotation. The evaluation will specifically address the following EPA's:

- i. Gather a history and perform a physical exam
- ii. Prioritize a differential diagnosis following a clinical encounter
- iii. Recommend and interpret common diagnostic and screening tests
- iv. Discuss orders and prescriptions
- v. Document a clinical encounter in the patient record
- vi. Provide an oral presentation of a clinical encounter

- vii. Give or receive a patient handover to transition care responsibility
- viii. Collaborate as a member of an interprofessional team
- ix. Recognize a patient requiring urgent or emergent care
- x. Identify system failures and contribute to culture of safety/improvement
- xi. Perform procedures/technical skills as defined by course syllabus

Professionalism & Administrative Tasks

All students are expected to carry themselves in a professional manner in all activities pertaining to the course. Professionalism is evaluated both globally and in the Y4 clinical evaluation form. It is expected that students will be on time and prepared for all course activities.

All assignments (listed in Canvas, provided in email communications, and/or discussed at orientation) must be turned in by the deadline specified by the course director. Repeatedly late assignments or the need for repeated reminders will result in a discussion with the course director and may result in a decrease in the professionalism grade and/or a professionalism concern report. Please see details in the grading rubric above.

Students are responsible for submitting the names of the APPs, interns, residents, fellows, and faculty they work with on each rotation, so those individuals can be sent evaluations with which to assess the students.

Professionalism concerns will result in discussion with the course director as well as any steps as defined in the Professionalism Concern Reporting SOP.

Additional Course Requirements

There will be a brief 15-minute presentation at the end of rotation where learner will present a summary and analysis of a recent journal article in the field of Pediatric Hematology/oncology. Details will be given to learner on the first day of rotation.

Graded Course Activities

NA

Course Educational Events, Content, & Outline

Clinic schedule: Monday throughout Friday (8AM-5PM). No weekend clinical time. Expect learners to read 3-5 hours outside of work and always review patient histories prior to clinic. Learners can attend weekly tumor board, and there are other monthly didactics like hematology conference, and journal club. Learners can attend pediatric academic half day on Tuesday afternoon with residents, but this is optional and depends on learner's interest. There will be mostly bedside learning, teaching in individual clinics, which may involve other lectures.

Other Important Course Information

N/A

Part 3: Objectives and Goals

Individualization Phase Goals and Objectives

This year-long clinical experience reflects the principles of the Wake Forest MD Program in that it reflects our commitment to:

- Empathy and respect for patients and colleagues
- Ethical decision making
- Health equity
- Intellectual rigor and scientific curiosity
- Leadership and innovation
- Patient-centered, team-based care
- Self-inquiry and lifelong learning
- The belief that even the most challenging problems can be solved

The primary goal of the final phases of medical education is to prepare students to successfully and smoothly transition into an internship in their chosen specialty after graduation, while meeting the competency requirements for a generalized medical degree. To achieve these goals, the 4th and final year is designed to strengthen the knowledge and clinical acumen required to become a physician, allow students to explore and/or refine specialty choices, and provide students with a broad-based clinical elective schedule that will make the student a better house officer and overall physician. Rotations in the Individualization Phase may be taken at either campus (Winston Salem or Charlotte) of the Wake Forest University School of Medicine (WFUSM).

By the completion of the Individualization Year, our students are expected to demonstrate:

1. **Knowledge for Practice** –demonstrate knowledge of the basic, clinical, and behavioral sciences, as well as the ability to apply that knowledge to patient care. Students are expected to:
 - a. Maintain sufficient clinical knowledge that can be translated to patient care
 - b. Routinely identify the need to seek new information in the context of clinical care
 - c. Complete all required course work for clinical rotations, including clinical responsibilities, assignments, and administrative tasks
2. **Interpersonal and Communication Skills** –communicate and interact effectively with patients, their families, and members of the inter-professional healthcare team. Students are expected to:
 - a. Demonstrate empathy
 - b. Engage in patient-centered interviewing and communication
 - c. Provide an oral presentation of a clinical encounter that is well organized and accurate
 - d. Document a clinical encounter in the patient record
 - e. Accurately document the reasoning supporting the clinical decision making
3. **Patient Care** –function as a member of an interprofessional healthcare team and provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health in diverse populations and settings. Students are expected to:
 - a. Gather a history and perform a physical exam
 - b. Demonstrate clinical reasoning by gathering information relevant to a patient’s care through history gathering, physical exam performance, and chart review
 - c. Develop and prioritize a differential diagnosis following a clinical encounter
 - d. Explain the clinical reasoning that lead to the differential diagnosis, working diagnosis, and management plan
 - e. Recommend and interpret common diagnostic and screening tests
 - f. Describe the implications and urgency of an abnormal result
 - g. Recognize patients with life-threatening and emergent presentations, and engage in appropriate management (triage, initial therapy, etc.)

Formatted: Header, Indent: Left: -0.08"

Formatted: Header, Centered

Formatted: Header, Right, Right: -0.08"

Formatted Table

Formatted: Header

4. **Professionalism** –demonstrate a commitment to upholding their professional duties, guided by ethical principles. Students are expected to:

- a. Maintain a professional image in attire, grooming, and behavior
- b. Display compassion, empathy, and respect for all patients, regardless of background, gender identity, race, ethnicity, and/or sexual orientation
- c. Be punctual and appropriately prepared for clinical responsibilities
- d. Establish and maintain rapport with patients and families
- e. Demonstrate honesty and integrity in all interactions, including with patients, patients' families and support systems, colleagues, and other health care professionals

5. **Practice-Based Learning and Improvement** –investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and life-long learning. Students are expected to:

- a. Demonstrate the ability to set learning and improvement goals
- b. Demonstrate an understanding of the need to engage in lifelong learning

6. **Systems-Based Practice** –demonstrate awareness and understanding of the broader health care delivery system and strive to use system resources to effectively provide patient-centered care that is compassionate, appropriate, and safe. Students are expected to:

- a. Demonstrate responsibility for their actions and errors
- b. Recognize realized or potential safety concerns and engage in reporting when appropriate
- c. Speak up when concerned about a potential safety concern
- d. Demonstrate appropriate handwashing and universal precautions

7. **Interprofessional Collaborative Practice** –participate as a contributing and integrated member of an interprofessional healthcare team to provide safe and effective care for patients and populations. Students are expected to collaborate as a member of an interprofessional team, including:

- a. Establish and maintain a climate of mutual respect, dignity, integrity and trust
- b. Use attentive listening skills when communicating with team members
- c. Help team members in need
- d. Prioritize team needs over personal needs in order to optimize delivery of care
- e. Demonstrate closed-loop communication

8. **Personal and Professional Development** –demonstrate the qualities and commitment required to sustain lifelong learning, personal and professional growth. Students are expected to:

- a. Form clinical questions and retrieve evidence to advance patient care
- b. Engage in self-reflection, self-appraisal, and self-directed learning
- c. Demonstrate openness to feedback

Course Specific Goals and Objectives

Upon completion of this Pediatric Course, the student should be able to:

Course Learning Objective	Institutional Objective Domain	Institutional Objective Subdomains	Methods of Assessment
---------------------------	--------------------------------	------------------------------------	-----------------------

Learners will be able to develop differential diagnoses for patients within the specialty of hematology oncology.	1,3	1.1,1.2,1.3,1.4	Participation Clinical Performance Rating
Learner will demonstrate professionalism behavior and perform tasks and responsibilities in a timely manner.	4,6,8	4.1,4.3,4.2,4.4	Participation Clinical Performance Rating
Learner will demonstrate effective communication with patients and families to develop therapeutic relationships and is able to document effectively in written format and discuss reasoning for differential diagnosis in written and oral presentations.	1,2,3,4	1.1,1.2,1.3,2.1,2.2,2.3	Participation Clinical Performance Rating

Formatted: Header, Indent: Left: -0.08"

Formatted: Header, Centered

Formatted: Header, Right, Right: -0.08"

Formatted Table

Formatted: Header

Entrustable Professional Activities

The following EPAs are observed and/or evaluated in this course:

EPA 1: Gather a history and perform a physical exam.

EPA 2: Prioritize a differential diagnosis following a clinical encounter.

EPA 3: Recommend and interpret common diagnostic and screening tests.

EPA 4: Discuss orders and prescriptions.

EPA 5: Provide documentation of a clinical encounter in electronic format.

EPA 6: Provide an oral presentation of a clinical encounter.

EPA 7: Form clinical questions and retrieve evidence to advance patient care.

EPA 8: Give or receive a patient handover to transition care responsibly.

EPA 9: Collaborate as a member of an interprofessional team.

EPA 10: Recognize a patient requiring urgent or emergent care and initiate evaluation and management.

EPA 13: Identify system failures and contribute to a culture of safety and improvement.

Part 4: Policies, Procedures, and Best Practices

Syllabus Change

Except for changes that substantially affect implementation of the evaluation (grading) statement, this syllabus is a guide for the course and is subject to change without advance notice.

Dress Code

It is important to follow the institutional dress policy. This may be different between institutions. It is your responsibility to be aware of the policy at the institution where you are rotating. In general, please remember:

- Patient care areas are "fragrance free," which means that cologne, perfume, scented hairspray or skin care products, strongly scented laundry products, etc. are not permitted.
- There may be locations of care where white coats are not worn but your white coat should always be accessible.

Remediation

Remediation that adheres to current remediation policies and procedures must occur any time a student does not successfully pass a course or clerkship. WFUSM's current remediation guidelines entail a remediation process that involves identification of deficiencies, development of a learning plan that may include assessment measures (e.g., a test, a CPX, an OSCE) to ascertain that the deficiencies have been corrected, and the student has achieved the course/clerkship learning objectives. This plan is agreed upon by the student and the course or clerkship and documented in a written plan, which must be approved by Associate Dean of Clinical Education.

Please see the Satisfactory Academic Progress policy and the Student Professionalism and Academic Review Committee (SPARC) policy for details.

Duty Hours

We adhere to the following duty hour restrictions:

- A student may be scheduled for an average of 80 duty hours per week during a four-week period.
- Duty hours must be structured to allow a minimum of four 24-hour time periods free over a four-week time period for the duration of the course.
- Duty hours may not exceed 24 continuous hours, following which students should have at least 14 hours duty free. Periods of assigned responsibility may not exceed 24 continuous hours, with 4 additional hours for patient care continuity.
- Duty hours may also include overnight call or shifts. The maximum frequency of overnight call is once every third night. For students completing overnight shifts, the maximum number of overnight shifts is 5 nights sequentially. Following 5 overnight shifts, students will not be expected to return until the next calendar day.
- Students must be excused from duty hours no later than midnight of the night prior to a shelf or final examination.
- Students are to be excused from duty hours on all days that have been identified as holidays on the WFUSM-MD program academic calendar.

Attendance and Participation

Y4 Individualization Policy: All absences, no matter the duration, must be submitted through the Student Scheduling and Absence System (SSAS) on Wake Track when needing to be absent for an assigned location or service, whether you are sick or not, for review by the Clinical Operations group.

- **Planned Absences:** All SSASs for planned administrative time must be submitted at least 14 days before the beginning of the course.
- **Unplanned Absences (sick or emergency):** Students must submit a SSAS within 24 hours if unable to do so prior to the absence. As soon as the student realizes they will be late or absent, they should contact their team, course director, and coordinator to make them aware prior to the start of the activity or day they will miss.

Clinical time, tasks and assignments must be made up as determined by the course director and in accordance with the Satisfactory Academic Progression policy.

Course Specific Policy:

If you are unable to arrive on time for or attend an educational activity, clinical assignment, or other course activity, for any reason, immediately notify (when able) the course director, course coordinator, faculty physician and/or clinical

Formatted: Header, Indent: Left: -0.08"

Formatted: Header, Centered

Formatted: Header, Right, Right: -0.08"

Formatted Table

Formatted: Header

team (if arriving for a clinical assignment) via the agreed upon communication route (email, text, and/or secure chat). It is also the responsibility of the student to submit an unplanned SSAS request.

Didactic Attendance and Participation: Wake Forest University School of Medicine expects students to participate in all instructional activities. Online or virtual didactics are no different from in person didactics in this regard.

Wake Forest University School of Medicine Guidance on Artificial Intelligence

Use only with prior permission.

Students may use AI tools on assignments in this course if permission is obtained from the course director in advance. This permission is given at the discretion of the course director, this permission may be revoked at any time, be limited to specific assignments, or be limited to specific AI tools. Any use without permission, or use outside of the previously defined allowable use, will be considered misconduct, and will result in a referral to the Honor Council.

miscited usage, or usage of any tools on unallowed assignments will be considered misconduct and may result in a referral to the Honor Council.

End of Course Evaluation

Engagement of students in the evaluation of our curriculum, and the collection of complete and actionable data for each offered course and clerkship, is an expectation of our accrediting bodies. In recognition of the importance of student course evaluation data in the effort to remain an accredited medical school, the Wake Forest University School of Medicine Undergraduate Medical Education Curriculum Committee (UMECC) requires students to complete the end-of-course evaluation surveys for each course and clerkship. Consequently, survey completion within one week of course conclusion is a requirement for MD program participation. Students who do not fulfill this requirement will receive escalating support and attention, and if the survey is not completed after three email reminders, a formal professionalism concern report may result.

Student end-of-course survey responses are highly confidential. **Only de-identified, collated data are provided to course directors (after the grades are issued), faculty, and governance committees for continuous quality improvement.**

Appeal of Grades, Summative and Narrative Comments

Students that have questions or concerns about their final grade, summative or narrative comments should refer to the Appeal of Grades, Summative Assessments, and Narrative Comments policy. This policy can be found in the student handbook in PolicyTech.

Student Behavior Policy/Professionalism

PROFESSIONALISM EXPECTATIONS OF STUDENTS

Students are expected to meet WFUSOM's standards of professionalism performance. Medical professionalism is defined as how our actions and behaviors demonstrate our commitments to the values, responsibilities, knowledge, and skills necessary for establishing our trustworthiness to serve as physicians. Professional trustworthiness consists of 4 domains, each of which apply to all of our professional relationships.

Summary:

Formatted: Header, Indent: Left: -0.08"

Formatted: Header, Centered

Formatted: Header, Right, Right: -0.08"

Formatted Table

Formatted: Header

- **Trustworthiness in competence:** The student fully engages with and monitors their learning to ensure they are developing the knowledge and skills needed to perform their professional duties, including incorporating feedback and seeking assistance when needed.
- **Trustworthiness in humanity:** The student demonstrates care and respect to ensure others' well-being, including patient-centered care, respectful teamwork, and safety practices.
- **Trustworthiness in morality/ethics:** The student acts ethically, including demonstrating honesty and transparency, owning their mistakes, and complying with the school's and medical center's policies and code of conduct.
- **Trustworthiness in duty fulfillment:** The student promptly follows through with all professional expectations and duties, including completing assigned tasks, responding to communications, maintaining learning resources and school spaces, and attending to their self-care and wellness needs.

The following table provides a more detailed description of our expectations of students' professionalism performance, organized by trust domain and virtue commitments:

Trustworthiness in COMPETENCE: Our demonstration that we have the requisite knowledge and skills to perform our professional duties		
Virtue commitment:	Expectations of Students:	Themes:
Commitment to excellence	Students will be fully prepared as instructed for all learning events. Students will invest appropriate effort into in-class, clinical workplace, and assigned outside-of-class learning activities. Students will engage in formative, self-regulated learning activities (e.g., practice exercises) to monitor and enhance their academic progress.	<i>Accountability for one's own learning through:</i> - Preparation - Effort - Engagement
Commitment to ongoing improvement (growth mindset)	Students will seek, be receptive to, and incorporate feedback from others on their performance. Students will seek assistance as needed and take steps to address their knowledge and skill deficiencies. Students will work to identify and mitigate their own implicit and cognitive biases .	<i>Self-improvement</i> <i>Feedback</i> <i>Help-seeking for learning needs</i> <i>Metacognition</i>
Commitment to intellectual humility	Students will take ownership of limitations in their knowledge, skills, and experience, seeking help appropriately for tasks beyond their current knowledge or skill level.	<i>Ownership of limitations</i>

Formatted: Header, Indent: Left: -0.08"

Formatted: Header, Centered

Formatted: Header, Right, Right: -0.08"

Formatted Table

Formatted: Header

	Students will acknowledge that complexity, ambiguity, and clinical uncertainty are inherent to the study and practice of medicine.	<i>Acknowledging innate uncertainty</i>
--	---	---

Trustworthiness in HUMANITY: Our demonstration that we care about and respect others and will do what is in their best interest to ensure their well-being

Virtue commitment:	Expectations of Students:	Themes:
Commitment to respectful collaboration and a safe, inclusive work and learning environment	Students will work cooperatively and respectfully with others , demonstrating respect for others' values, beliefs, opinions, and perspectives, regardless of differing personal identities (e.g., race, religion, sexual orientation, gender identity, age, or other differentiating factor). Students will provide feedback to peers respectfully and effectively (i.e., specific, timely, and actionable). Students will recognize others' concerns and actively contribute to effective conflict resolution.	<i>Respectful teamwork</i> <i>Respectful, effective feedback</i> <i>Effective conflict resolution</i>
Commitment to own and others' safety	Students will ensure they meet all requirements according to the school's Medical Health Requirements and Immunization Policy. Students will demonstrate correct hand hygiene and use of personal protective equipment during lab and patient care activities. When sick with a potentially communicable illness, students will promptly contact Employee Health and follow their instructions regarding the need for testing and when they are permitted to return to in-person learning activities and clinical care of patients. Students will identify and report systems errors and safety threats/occurrences.	<i>Upholding institutional policies regarding health and safety</i>
Commitment to patient-centered care	Students will demonstrate respect toward patients , actively seeking to understand patients' values, beliefs, perspectives, and concerns. Students will explore new or unfamiliar beliefs and perspectives in preparation for future encounters. Students will demonstrate empathy and compassion toward patients. Students will use inclusive language when referring to patients verbally or in writing.	<i>Patient respect</i> <i>Active learning of patient identities</i> <i>Empathy / compassion</i>
Commitment to healthcare equity & social justice	Students will promote justice, impartiality, and fairness regarding access to resources and support for all patients. Students will acknowledge historical and current systemic contributors to medical mistrust, trauma, and inequities.	<i>Promoting fair and equitable access to care</i>

Formatted: Header, Indent: Left: -0.08"

Formatted: Header, Centered

Formatted: Header, Right, Right: -0.08"

Formatted Table

Formatted: Header

Trustworthiness in MORALITY/ETHICS: Our demonstration that we will act ethically and do the right thing in all of our work		
Virtue commitment:	Expectations of Students:	Themes:
Commitment to honesty and integrity	Students will be forthright, truthful, and fully transparent, including honesty regarding their own vs. others' contributions to group work, appropriate citation of information sources used, and in all patient care documentation. Students will disclose all known conflicts of interest (COI) as per the school's COI Related to Student Assessment Policy. Students will fully adhere to the school's Code of Honor and Professional Conduct and exam administration policies. Students will take responsibility for their mistakes and proactively take steps to prevent future errors.	<i>Complete self / group honesty</i> <i>Disclosing COI</i> <i>Compliance with institutional policies and honor code</i> <i>Ownership of mistakes</i>
Commitment to core ethical principles	Students will appropriately apply the principles of autonomy, beneficence, non-maleficence, and justice to navigate issues in clinical practice.	<i>Application of ethical principles to clinical practice</i>
Commitment to patient confidentiality	Students will maintain confidentiality of patient information before, during, and after patient encounters.	<i>Confidentiality</i>
Commitment to appropriate interpersonal boundaries	Students will discern and maintain appropriate interpersonal boundaries with others in educational and work settings.	<i>Interpersonal boundaries</i>

Trustworthiness in DUTY FULFILLMENT: Our prompt follow-through on all of our professional expectations and duties		
Virtue commitment:	Expectations of Students:	Themes:
Commitment to professional presentation	Students will dress professionally for learning and/or clinical activities requiring it, according to the school's Dress Code for Medical Students Policy.	<i>Professional attire</i>
Respect for others' time	Students will arrive on time for all attendance-required educational/clinical activities and scheduled meetings. Students will respond promptly to communications from others (peers, staff, faculty, and leadership).	<i>Punctuality</i> <i>Prompt responses to communications</i>
Ownership of professional responsibilities	Students will submit assignments and complete tasks promptly, according to the assigned deadline. Students will ensure assignments are written clearly, accurately, and completely. Students will contribute an appropriate amount of effort to group work. Students will submit absence requests promptly and as instructed per the school's Attendance Policy.	<i>Timely task completion</i> <i>Appropriate effort in group work</i> <i>Timely absence requests</i>

Formatted: Header, Indent: Left: -0.08"

Formatted: Header, Centered

Formatted: Header, Right, Right: -0.08"

Formatted Table

Formatted: Header

	Students will communicate promptly with instructors/course directors regarding absences from required educational/clinical activities and make-up assignments as instructed per the school's Attendance Policy.	
Commitment to maintaining educational spaces, tools, and resources	Students will ensure educational spaces (small group rooms, simulated exam rooms, lab spaces, sim rooms, clinical work rooms, student lounge areas, etc.) are left clean and tidy , with tools and furniture placed back in their original locations, following use.	<i>Maintaining shared spaces / resources</i>
Commitment to systems processes to improve curriculum quality	Students will complete the end-of-course/clerkship evaluation survey, providing constructive feedback , including specific and actionable next steps.*	<i>Constructive curriculum feedback</i>
Commitment to self-care	Students will actively foster their own wellness and resilience . Students will seek assistance for psychological and/or physical needs that may impact their academic performance or result in time away from the curriculum being necessary.	<i>Wellness activities Seeking resources as needed</i>

Other Course-Specific Professionalism Expectations:

If students are unable to meet the above professionalism expectations, performance feedback will be provided to the student, and the student will be expected to take measures to address the concerns identified. Assistance from Student Affairs and/or the Center for Personal and Professional Development (CPPD) will be offered to students to help them to develop effective strategies to address these concerns.

Infractions of the Code of Honor and Professional Conduct will be managed according to the procedures as outlined in this section of the WFUSOM MD Program Student Handbook and per the Student Professionalism and Academic Review Committee (SPARC) Policy.

The Family Educational Rights and Privacy Act of 1974 (FERPA)

FERPA prohibits release of student information related to academic performance without students' written consent. the following information concerning students is considered by the School to be directory information and may be disclosed without a student's consent, unless the student indicates in writing and submitted to the Registrar that any or all of the items are not to be released: Name; Address; Telephone number; Electronic mail address; Date and place of birth; Major field of study; Enrollment status; Dates of attendance; Degrees and/or awards received at the School; Participation in officially recognized activities; The most recent previous educational agency or institution attended by the student; and Other similar information, such as a photograph. If you have questions about FERPA please contact the Registrar's office.

Early Alert

As your director and coordinator, we are committed to supporting YOUR academic success in this course. For that reason, if you demonstrate any academic performance, professionalism, or behavioral problems which may impede your success, we may discuss and attempt to resolve the issue with you, or we may, if the situation requires, forward concerns to the appropriate person or group (for example, Associate Dean, Student Affairs, CRESS ACA, CAWS, SPARC, etc.) to seek support and assistance in the matter. The goal is to make your learning experience in this course as meaningful and successful as possible. You are also encouraged to approach your course director and coordinator if you are experiencing any challenges related to the course as early as possible.

Student Outreach Services

Care Team: The CARE Team exists to ensure that all Wake Forest School of Medicine students have access to appropriate support as they adjust and succeed in demanding health sciences programs. This team provides a centralized system of prompt communication, coordination, and response for students in need of further support or at times of distress. Distress may include but is not limited to academic, financial or medical concerns, social pressures, personal well-being, or safety and security concerns.

You may contact the CARE Team via the [online form](#), emailing the CAREteam@wfusm.edu or calling campus/hospital security if the issue is an emergency.

Learning Environment/Mistreatment Reporting

The Liaison Committee on Medical Education (LCME) states, "Mistreatment, either intentional or unintentional, occurs when behavior shows disrespect for the dignity of others and unreasonably interferes with the learning process." Examples include discrimination and harassment; public humiliation; physical harm or threats of harm; and threats of lower evaluations or lower grades.

Wake Forest School of Medicine is committed to creating and maintaining a learning environment that supports and encourages respect for every individual and promotes the development of professionalism among medical students. If you experience or witness an instance of mistreatment or learning environment concern, we encourage you to report the issue by reaching out the Learning Environment Liaison.

The global Learning Environment Liaison office is the central reporting resource for professionalism concerns for all School of Medicine students, as well as for visiting students, non-School of Medicine clinical students and non-affiliated student interns.

All School of Medicine learners may report mistreatment or learning environment concerns. To report a learning environment or mistreatment concern, or to report a positive learning environment experience, please contact them using one of the following methods:

- Via phone at **336-713-3352**
- Via email at edcompliance@wfusm.edu
- Via the [Learning Environment online reporting form](#) (requires login credentials)
- Concerns may also be reported through the Compliance Hotline at **844-587-0825** or at atriumhealth.ethicspoint.com

Academic Honesty & Integrity/Honor Code/Violations Process

As with all WFUSM courses, the [WFUSM Code of Honor and Professional Conduct](#) is in effect at all times.

ADA Statement

The WFUSM is committed to providing reasonable accommodations for all persons with disabilities as mandated by the provisions of the [Americans with Disabilities Act](#). If you have a disability that may have some impact on your work in this class and for which you may require accommodations, please contact the [Center for Learning, Access and Student Success](#) so that accommodations can be discussed & considered. Students who have disabilities and need accommodations should visit the [Center for Learning, Access and Student Success](#) and should follow the guidelines provided in the Student Disability Accommodations Requests policy and procedures.

The Center for Learning, Access, and Student Success (CLASS) will assist and advise students with documented disabilities in arranging academic support and reasonable accommodations. Accommodations will be arranged on an individual basis, specific to the student's needs. The goal is to provide students with disabilities with necessary accommodations so they may compete on an equal basis in the classroom with their peers. Students must meet with a representative from CLASS and provide all necessary documentation prior to receiving accommodations. Absent significant extenuating circumstance (as determined by CLASS), accommodations will not be retroactive. There may be an expiration date on the accommodations provided and the same accommodations may not be available on STEP exams.

CLASS serves as a resource to students, faculty, and staff on issues related to compliance with the Americans with Disabilities Act of 1990, the Americans with Disabilities Amendment Act of 2008, and Section 504 of the Rehabilitation Act of 1973.

Campus Safety and Security

Security Services strives to provide a safe and secure environment, at all times, for our students, patients, visitors, and employees. Security Services operates 24 hours per day, seven days a week.

Emergency Preparedness

1. Program Security Services' telephone number into your cell phone
 - a. Wake Forest School of Medicine Campus Security: **336-713-1568**
 - b. Atrium Health Wake Forest Baptist Medical Center Security: **336-716-9111**
 - c. Atrium Health Carolinas Medical Center Security: **704-355-3333**
2. In the event of an emergency, contact Security Services and/or dial 911.
3. If you "See Something, Say Something." Report to Security Services behaviors or suspicious packages that leave you feeling concerned, worried, or alarmed.
4. Sign up for the hospital/campus Emergency Notification System
5. Familiarize yourself with the various emergency situations and responses

If you have any questions regarding campus safety and security, contact Security Services.
